

## > **TECNOMODUL + TACO INOX**

System comprising a Tecnomodul pump (Tecnomodul Basic or Tecnomodul Comfort) and a Taco inox tank, drinking water tank in stainless steel connected to the Tecnomodul pump. The Tecnomodul pump manages the drinking water level and the tank inlet/outlet valves.

Taco inox tank includes an overflow system.

## > **TACOMAT INOX**

Drinking water tank in stainless steel with electronic device designed with external connections to control a complete rain water recovery installation. Includes:

Rain water level sensor

Type of water used (rain / drinking water).

Reset and manual/automatic operation buttons.

Leds showing rain water, drinking water and manual operation. Drinking water recycling and failure of the system. Computer connection for external control possible and memory storage.

Tacomat inox can be used with any type of pump, either submersible or surface, with following parameters:

Max. flow: 7.2 m<sup>3</sup>/h

Max. input current: 10 A.
